Jeff, Kimberly and Thuy,

The PREP Team is working on the last course of the season and the WQ and pesticide PREP planning group has identified PFAs as a topic they would like EPA OPP to cover – see yellow highlight. The group is looking for both an Agency overview of what is happening, and more detailed information, especially as it relates to water. When you have a moment can you let me know who is appropriate, willing and available to provide this information? It can be all three of you if that works best as long as there is sufficient time for Q&A. The time frame is one hour online via Zoom. Let me know if you need more information. I will work further with the speakers once they are identified.

Thanks for the help!

Cindy
